Davi Nomoeh Dani

Central Java, Indonesia | +62-823-2544-1718 | dapino.dev@gmail.com | dapino.my.id

I'm a **Software Engineer** with 5+ years of experience building backend services, REST APIs, and microservice-based applications across enterprise and SaaS environments. Experienced in Go, Node.js, TypeScript, PostgreSQL, and MongoDB, with hands-on expertise in system architecture, external API integrations, cloud infrastructure, and CI/CD.

PROFESSIONAL EXPERIENCES

PT PLN (Persero) Pusat Manajemen Proyek — Semarang, ID
Lead Backend Engineer — November 2024 - Present

As a Tech Lead BE at PT PLN (persero) Pusat Manajemen Proyek. I develop SIMPP (Sistem Informasi Monitoring Penugasan dan Pelaporan), an enterprise internal application built from scratch using a Go-based microservices architecture.

- Projects: 'Penugasan', Vendor (Claim Request & Price Adjustment) and e-IQC.
- RnD for AI Agent Automation, AI-assisted workflows combining OCR and LLM to identify potential document authenticity issues.
- RnD for secure intranet system architecture.
- Lead RnD Backend Engineer.
- Develop SIMPP Backend microservices using Go, Rabbit MQ, Postgres SQL, Kubernetes for All Projects.
- Digital Signature (Digisign) integration for multi-level approval workflows legalized across PLN documents.
- Leading technical decisions, system architecture to ensure quality, scalability, and secure by default based on PLN Security Standard.
- Mandatory Reviewer for All Project Microservices.
- **Skills: Go, PostgreSQL, MongoDB, Kubernetes, Rabbit MQ, AI Automation, Digital Signatures, Linux, Docker Container, CI/CD, Git, Microservices**

PT Jawara Solusi Nusantara — Semarang, ID
Backend Engineer — September 2022 - October 2024

- **Project:** Pesan.io (Hotel Booking Platform)
- Spearheaded NodeJS app maintenance and deployment on AWS servers, enhancing performance and reliability
- Optimized compiler configurations, slashing deployment time by 80%
- Developed a Business Intelligence app facilitating seamless integration of external data resources, empowering client system integrations
- Engineered a module for client-loyalty provider integration, enabling customer reward offerings
- Crafted a WhatsApp Chatbot, simplifying hotel room bookings via chat
- **Skills: Nest.js** (Typescript), **AWS, Docker, MongoDB**, **DevOps**, **Bash**, **Process Improvement, Container, Jest, CI/CD**

PT TRAVELOKA INDONESIA — Tangerang, ID
Backend Engineer Intern (Cloud) — February 2022 - July 2022

- Orchestrated migration of application infrastructure to AWS serverless platform, utilizing AWS ECS Fargate & AWS Codepipeline
- Proficiently provisioned AWS Infrastructure via Terraform
- Effectively communicated and educated stakeholders on new container stack deployment
- Collaborated across multiple teams, fostering enhanced communication and teamwork
- Minimize the same actions with creating a bot using Node.Js with research
- **Skills:** Working proficiency in **English**, **Java Spring Boot**, **AWS**, **DevOps**, **Bash**, **Terraform, Datadog**, **Process Improvement, Container, CI/CD**

PERSONAL PROJECTS

Supirbarang.com - Simplify delivery process

- Build an Android App (Flutter), Backend REST API (Nest.js, AWS, MongoDB), and Admin Panel (Next.js)
- Improved performance by migrating stacks from Full Stack Laravel to NestJs, reducing data load time by 60%
- Reduce 30K data load time by up to 60%
- Acquired 1 additional client this year

- View more on: https://supirbarang.com and Supir Barang on Play Store

Vooka - Interactive Music Bot for Discord

- **Stack**: Built with Node.js (Typescript) & Discord.js; Store client data to the Database (PostgreSQL)
- **Challenges**: Handle search based on queries with autocomplete and return related playlist; Handles even-loop while the bot is used by multiple users.
- View more on: https://vookav2.github.io

EDUCATION

Dian Nuswantoro University (Udinus) Semarang, ID

Bachelor of Informatics Engineering, Major in Computer Science August 2019 - February 2023

- GPA: **3.79**/4.0 (7th semester)
- Undergraduate Thesis: **Sentiment Analysis of Twitter User Opinions on Pertamina Using Lexicon-Based and Support Vector Machine**: Analyzed over 7,500 tweets regarding fuel price policy changes using TF-IDF and SVM models, achieving 94% accuracy and a 99% AUC score with the RBF kernel

AWARD & CERTIFICATION

- **Certified Web Developer - BNSP** February 2026
  Key certified competencies include:
  - Application Lifecycle & Deployment: Implementing application cutover, software updates, and migration to new technologies.
  - Testing & Reliability: User Acceptance Testing (UAT), debugging, monitoring, and setting up error alert notifications.
  - Security & Architecture: Managing security risks, utilizing SQL, and identifying required libraries, components, or frameworks.
  - Project Management: Managing project scope, quality, and integrated project execution.
- **Certified Associate Data Scientist - BNSP** March 2023
  Demonstrated competency across the data science workflow, including data collection, analysis, validation, data cleaning, data labeling, model development, and model evaluation.
- **Backend Laravel Development - Hacktiv8** March 2022
  Final grade of 91.78 (Grade A).
  - Core Stack: PHP 7.4, JavaScript, HTML5/CSS3, and MySQL/RDBMS
  - Framework & Architecture: Laravel, Lumen, MVC Pattern, Eloquent ORM, Blade Templating, and RESTful APIs.
  - Engineering Practices: Git/GitHub version control, authentication & security (CSRF, Auth library), unit/feature testing, and deployment.
- **Operating Systems and You: Becoming a Power User - Coursera** May 2020
- **Android Developer (Java) - Dicoding Academy** December 2019
- **2nd Winner of IT Software Application - LKS Jawa Tengah XXVII** October 2018
- **Web Developer (PHP Codeigniter) - Trainit** October 2017
